IMPORTANT MSDS INFORMATION

Dear Customer:

Streck Laboratories, Inc. manufactures calibrators and quality control materials for hematology, immunology and clinical chemistry analyzers. None of these products contain hazardous chemicals at concentrations of 1% or greater, or known carcinogens at concentrations of 0.1% or greater. As a result, Material Safety Data Sheets (MSDS) are not required for these products (reference 29CFR1910.1200 (d) (5)).

Streck's products are classified as *in vitro* diagnostics and regulated by the FDA. Accordingly, all applicable precautions are stated in the package insert that accompanies each product.

Streck Laboratories suggests you place a copy of this letter in any place you would ordinarily keep an MSDS. This step will document your laboratory's compliance with OSHA requirements.

Yours sincerely,

Paul Kittelson
