Patient Name: Smith, John	Sex: M	Date of Birth: 10/26/1954	Age: 54	Date Collected: 10/23/2007	Time Collected: 10:04 AM
Phone: (123) 456-7788	Req Number			Date Received: 10/26/2007	Time Received: 1:20:08 PM
Physician's Name: John Smith	Status: Report complete			Report Date: 10/30/2008	Report Time: 12:34:13.60 PM

Test Name	Results	Range
Prostate Specific Antigen (PSA)**	1.7 ng/mL	Less Than 4 ng/mL

Prostate Specific Antigen (PSA) test result is within a desirable reference range

This test was performed using the Siemens ADVIA Centaur XP Immunoassay system. PSA levels below 4.0 are within the accepted reference range and are considered normal. While an elevated PSA result is not an automatic indicator of prostate disease, a low number, all by itself, does not necessarily rule out a problem. Only your physician, comparing your PSA result with that of a digital rectal exam, can make an accurate assessment of your current prostate health.

*Tests are performed by either:
HealthPoint Diagnostix, Inc. Lincolnshire, IL 60069
or
New Century Diagnostics, Buffalo Grove, IL 60089

Test results do not make a diagnosis of any kind and should never replace an office visit with your doctor.

Never adjust your medications before you consult with your physician.
